- > Pallet Fork Frame

Cross Agricultural Engineering – “It’s the Obvious Choice”

Cross IBC Power Washer

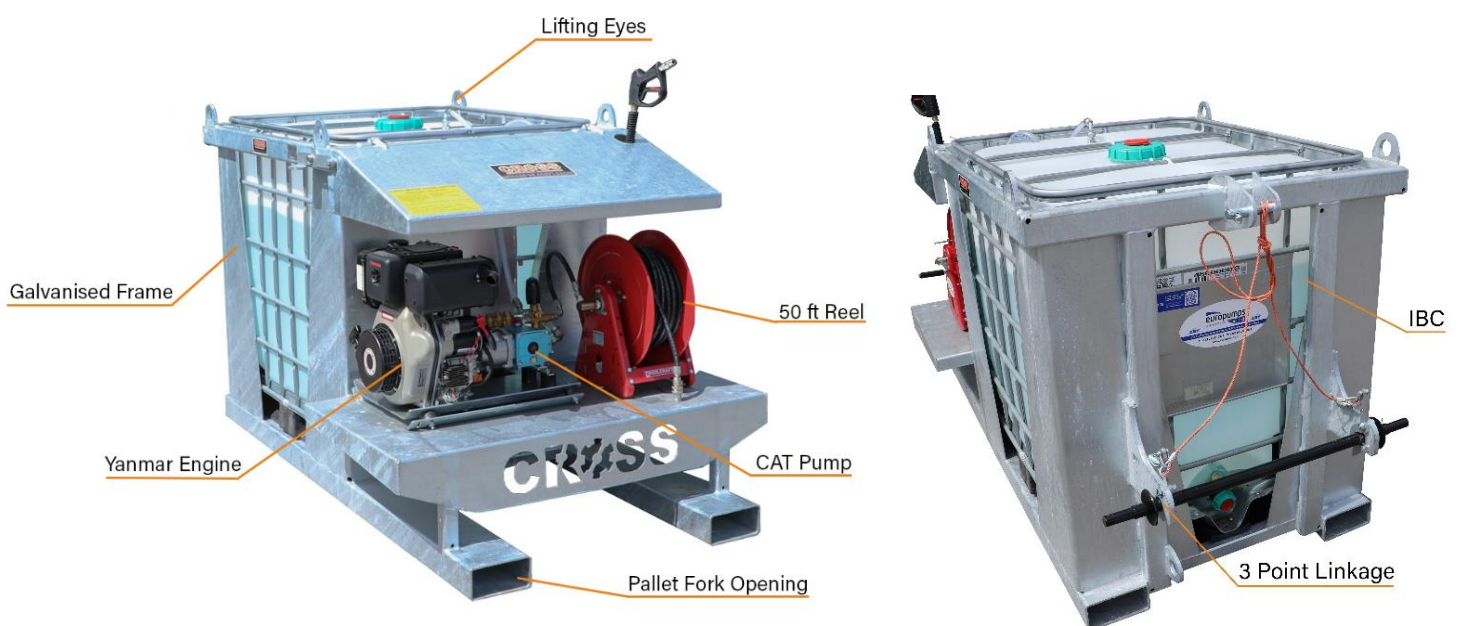

All Cross Agricultural Engineering machines are built to the highest standards by a team of dedicated engineers using quality materials and manufactured in the latest high-tech manufacturing facilities. The Cross IBC Power Washer is produced in conjunction with Europumps and is the obvious choice on the market today.

The Cross IBC Power Washer is manufactured using high-quality, heavy-duty steel, which is galvanized to stand up to the tough Irish conditions. With its 1000 litre water tank and diesel-powered pump, the self-contained Cross IBC Power Washer can work continuously for hours before being refilled. The unit is easy to move, either using the lifting eyes, pallet forks or 3-point linkage. This makes it the obvious choice for use on building sites, farms or any other industrial setting. The lifting eyes are rated for 500kg each, so the unit can be lifted even when full of water.

The CAT pump has a maximum pressure of 120 bar, which is more than enough for any power washer applications. The Cross IBC Power Washer can make light work of even the toughest jobs. The Yanmar single cylinder diesel engine is easy to start, and is a low noise unit, making it the obvious choice for driving the pump. The heavy duty 50ft hose reel gives the unit ample range to cover a large area before moving. The tensioning device stops free spooling of the reel, helping to keep the hose tidy and prevent kinking when dragging it across the yard.

The Cross IBC Power Washer is the obvious choice for any farm or construction site where mobile power washing work is required. The heavy duty, galvanized frame is designed with the harsh Irish and UK conditions in mind. The engine, pump and reel are covered to keep the worst of the conditions out, preserving their lifespan.

In place of the Cross logo, you can have your own business logo cut in the front panel. Contact one of our sales team for more details.

Manoeuvrability

The biggest benefit of this machine is how easy it is to move. Using either the pallet fork openings, 3-point linkage or lifting eyes, the Cross IBC Power Washer can be moved with any tractor, forklift, loader or crane that might be available to the user. Due to the heavy-duty chassis, the machine can be lifted when full using any of the 3 options outlined.

Powerful Washing

The Cross IBC Power Washer has a 13 hp engine and CAT pump, meaning it can tackle any washing task. With the 50ft hose reel and 1000 litre capacity this machine can wash for hours before being moved or refilled.

Custom Naming

In place of the Cross logo on the front of the machine, you can have your own company logo. Contact one of our sales team for more information

Cross IBC Power Washer

Technical Data

| IBC Power Washer | |
|------------------|-------------------------|
| Capacity | 1000 Litres/223 Gallons |
| Max Pressure | 120 Bar |
| Engine Power | 13 Bhp |
| Reel Length | 50 ft |
| Weight when Full | 1600kg |
| Overall Height | 1320mm |
| Overall Length | 2300mm |
| Overall Width | 1340mm |
